

Firmware Upgrade Instructions

NOTE: 1

Always use a WIRED connection (Ethernet cable) for upgrading router firmware.

1. Open Internet Explorer and browse the default router IP address (192.168.2.1) to open the Router GUI login prompt.

2. Login to your Aztech HW550-3G Router using below default login credentials
Username: **admin**
Password: **admin**

NOTE: 2

If the router cannot be logged in using the default login credentials or if the router login password is forgotten, reset the router manually by pressing the reset button. In this case, follow the [Detailed Configuration Manual](#) for reconfiguring the router again.

3. Upon successful login to the router, click on Advanced Mode

Aztech HW550-3G

4-Port Wireless N Router plus HSPA Support for 3G Mobile Broadband

4. From Advanced Mode, Proceed to **System (1)** and select **firmware (2)** to open firmware upgrade wizard.

Browse (3) and locate the newly downloaded firmware on your connected computer. Click on **Upgrade (4)** button to load the firmware to your Aztech HW550-3G Router.

NOTE: 3

*Please do not **Power off** or **disconnect** your router while firmware upgrade process.*

5. After the upgrade verify the new firmware as 201.83.3-005.
