

How to configure Internet on Aztech 605EU?

Aztech 605EU

1. Open a browser & go to <http://192.168.1.1>
2. Under Basic Menu, click Quick Start.
3. Enter the username & password.
4. Select the protocol according to the port.
5. Make sure VPI=0 & VCI=50.

The screenshot shows the configuration interface for an Aztech 605EU router. The top navigation bar includes "Save Settings", "Restart Router", "Basic", "Advanced", "Security", and "Status". The "Basic" menu is selected, and the "Quick Start" sub-menu is active. The interface contains the following fields and options:

- User ID:** A text input field containing "username". Below it, an example is provided: "Example: user@ispname".
- Password:** A text input field with masked characters "••••". Below it, a note states: "Provided by your ISP."
- Protocol:** A dropdown menu currently set to "PPPoA VC-Mux".
- VPI:** A text input field containing "0".
- VCI:** A text input field containing "50".

At the bottom left, there is a "Connect" button. At the bottom right, a red note reads: "Note: After clicking on Connect, please be sure to click on 'Save S...' your username/password and other settings will be saved for next".

6. Click Connect.
